Battery test technician

Frequently Asked Questions

What are the duties of a battery technician?

Battery technicians perform preventative maintenance inspections of customer's batteries, chargers, battery handling equipment, and battery changing/charging area and record data. They have a strong knowledge of DC power systems, batteries, rectifiers, and related equipment. They are responsible for installing, maintaining, and repairing DC power systems, batteries, rectifiers, and other related equipment.

What does a battery test manager do?

This manages the planning and execution of test procedures including schedule definition, management, control and monitoring of the battery test systems and device under test. It also analyses test results as well as the overall efficiency of the lab to identify potential improvements. This helps to minimise the test time.

What does a service technician do?

A service technician shares knowledge and trains and develops less experienced technicians. They conduct tests of safety equipment to ensure OHSA and operational standards. The company aims to have a service technician onsite within 24-48 hours or sooner for emergency calls.
