Find battery investors

Frequently Asked Questions

How many companies does battery invest in?

Battery has invested in more than 450 companies over our 40-year history, and we've been fortunate to back some very big ideas. Our investment staff works together as a single, global unit to evaluate and support potential investments.

Who is Battery Ventures?

Battery Ventures is a global, technology-focused investment firm. Founded in 1983, the firm makes venture-capital and private-equity investments in markets across the globe from offices in Boston, Silicon Valley, San Francisco, Israel and London.

Will VC invest in EVs & batteries in 2023?

In 2023, global VC investments in clean energy start-ups, including EVs and batteries, fell considerably relative to 2022. The growing momentum of electric vehicles and their potential for substantial financial returns in the future have led to a boom in Venture Capital (VC) funding for EVs and battery startups in the past decade.

Who is involved in the battery industry?

The battery industry is also complex and fragmented, with multiple players involved at each step of the value chain. These include miners and processors of raw materials, component producers and battery manufacturers, and end users and recyclers.

How many companies has battery invested in in 2021?

As of 2021, Battery has invested in more than 450 companies, 69 of which have gone public and another 185 have merged or been acquired. The firm's current investment focus includes:

Which chemistries are leading EV & battery startups in 2023?

Lithium chemistries accounted for just 60% of the total, while the share of emerging concepts such as metal-hydrogen, redox-flow, solid state and sodium-ion batteries rose, growing from less than 15% to more than 25%," it added. Explore the 2023 global trends in venture capital funding for EV and battery startups.
