

**TSHISEVHE C&I ENERGY**

## **Price of wall mounted solar installation**

### **Overview**

In the UK, the cost to install solar panels on your home typically ranges between £5,000 and £12,000, with the average cost hovering around £8,500.

### **Frequently Asked Questions**

#### **How much does a solar panel installation cost?**

Generally, two installers will work together to install your solar panel system, and depending on its complexity, they can take up to 3 days to complete the installation. This means that you can expect to spend anywhere between £600 and £3,000 on labour costs alone.

#### **Can solar panels be mounted on walls?**

There are purpose-built solutions on the market for mounting solar panels on walls. These are costly, and you need to buy them for each panel. The added cost is an important consideration. However, the advantage of these systems is that you can angle your panels more easily, as this functionality is built-in.

#### **How much does a solar panel cost per kilowatt?**

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 – £1,500 whereas polycrystalline solar panels cost about £900 per kW.

## **How much will 10 solar panels cost in the UK?**

The cost of 10 solar panels in the UK can vary based on several factors, including the type of panels and the brand you choose. Depending on the size of the solar panels, it will cost between £5,000 to £6,000 to install 10 solar panels, not taking into account labour costs.

## **How much does solar panel maintenance cost?**

Solar panels generally require minimal maintenance, but cleaning solar panels is important to ensure optimal performance. This can be done by professionals, which may incur some costs. Typically, annual solar panel maintenance costs are about £100 – £200.

## **How far from the wall can a solar panel be mounted?**

Without projecting a panel beyond 200mm from the wall, from the wall, you can mount a typical panel with dimensions 170cm by 110cm at around 80°. A wall-mounted panel gives much better consistency and peaks in spring and autumn compared to the summer. Yearly production ~290kWh. There are multiple options for mounting panels on a wall.
