Repair price of 18-year-old pure electric battery

Overview

Keep reading to find out what an EV battery is, how long it lasts, how to know if yours is going bad, what it might cost you to repair or replace yours and whether a warranty can help.

Frequently Asked Questions

How much does electric car battery replacement cost?

Electric car battery replacement costs outside of warranty typically range from \$5,000 to \$16,000, depending on the pack size and manufacturer, but these out-of-pocket repairs are extremely rare. If you buy a new EV, you will probably never have to think about battery replacement or even battery maintenance.

How much does a battery replacement cost?

On average, the cost ranges from \$5,000 to \$16,000, depending on the brand and model. Some factors influencing this cost include battery size, technology, warranty coverage, and labor costs. For example, Tesla battery replacements can cost between \$12,000 and \$15,000 for a Model S.

How much does a new EV battery cost?

Cost estimates: Replacement costs can vary significantly. A report from the University of Michigan (2022) stated that the average cost of a new EV battery ranges from \$5,000 to \$15,000. This price can depend on the vehicle model and battery capacity. Owners should research specific models to obtain accurate estimates.

How much does a lithium ion EV battery cost?

According to the DOE, the cost of a lithium-ion EV battery was 89 percent lower in 2022 than it was in 2008, and this trend is continuing as production volume increases and battery technology advances. Still, even with the drop in costs for EV battery packs, the cost to replace a battery pack could range from around \$7,000 to nearly \$30,000.

How much does it cost to replace a Tesla battery?

We haven't necessarily seen this lowered cost reflected in the pricing Tesla owners have reported from replacement estimates, but it does give us hope that Tesla battery replacement costs will go down in the near future. In general, the cost to replace a Tesla Battery will run anywhere from \$7,500-\$15,500.

How much does a car battery cost?

The high costs involved come down to the price of the battery itself, which can be north of \$10,000 for popular vehicles like the Tesla Model S or Model 3. Electric vehicle owners are limited in where they can get batteries, with most being forced to go through the manufacturer.
